

Gordon Dunn Report March 2018

Research Reports

1) Eradication of spontaneous malignancy by local immunotherapy:

<http://stm.sciencemag.org/content/10/426/eaan4488.full>

2) Two Drugs Offer Hope Against a Tough-to-Treat Prostate Cancer:

<https://consumer.healthday.com/cancer-information-5/prostate-cancer-news-106/two-drugs-offer-hope-against-a-tough-to-treat-prostate-cancer-730971.html>

3) Apalutamide Treatment and Metastasis-free Survival in Prostate Cancer:

<http://www.nejm.org/doi/full/10.1056/NEJMoa1715546>

4) Curcumin suppressed the prostate cancer by inhibiting JNK pathways via epigenetic regulation:

<https://www.ncbi.nlm.nih.gov/pubmed/29485738>

For what it is worth, India uses a lot of curcumin in its cooking and does have a significantly lower rate of prostate cancer.
